

API de Star Wars Hecho por Mitchell Chavarria MindHub Blanca Vargas y Dalila Mistura

Septiembre 16, 2024

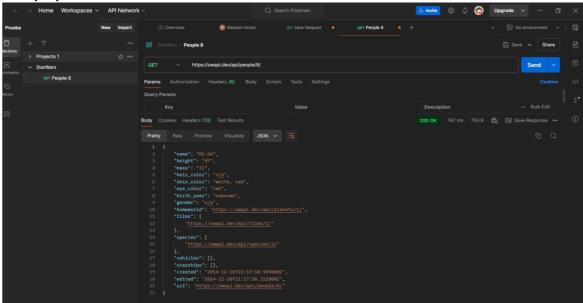

Vamos a trabajar buscando datos en la API de Star Wars

Ingresa a la siguiente URL: https://swapi.dev

- a. Utilizando la API de Star Wars y Postman: verifica los datos en ambas herramientas, en Postman generar una colección con el nombre: StarWars.
- b. Te pedimos que valides y muestres la siguiente información:
- 1. Traer el JSON de people 8 **Resultado:**

JSON people 8 desde API

JSON people 8 desde Postman

¿Qué status me arroja el sistema en el planets 1?
 La solicitud nos arroja un status code 200 lo que hace referencia que la solicitud se realizó correctamente y los datos solicitados están disponibles

```
Try it now!

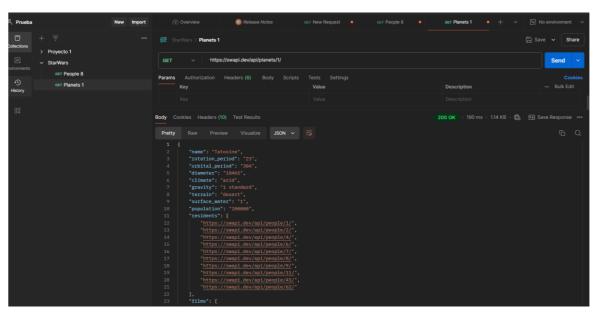

https://swapi.dev/api/

Need a hint? try people/1/ or planets/3/ or starships/3/

Result:

{

    "name": "Tatooine",
    "rotation_period": "23",
    "orbital_period": "304",
    "diameter": "18465",
    "climate: "arid",
    "gravity": "1 standard",
    "terrain": "desert",
    "surface_water": "1",
    "population": "2000000",
    "residents": [
    "https://swapi.dev/api/people/2/",
    "https://swapi.dev/api/people/4/",
    "https://swapi.dev/api/people/8/",
    "
```

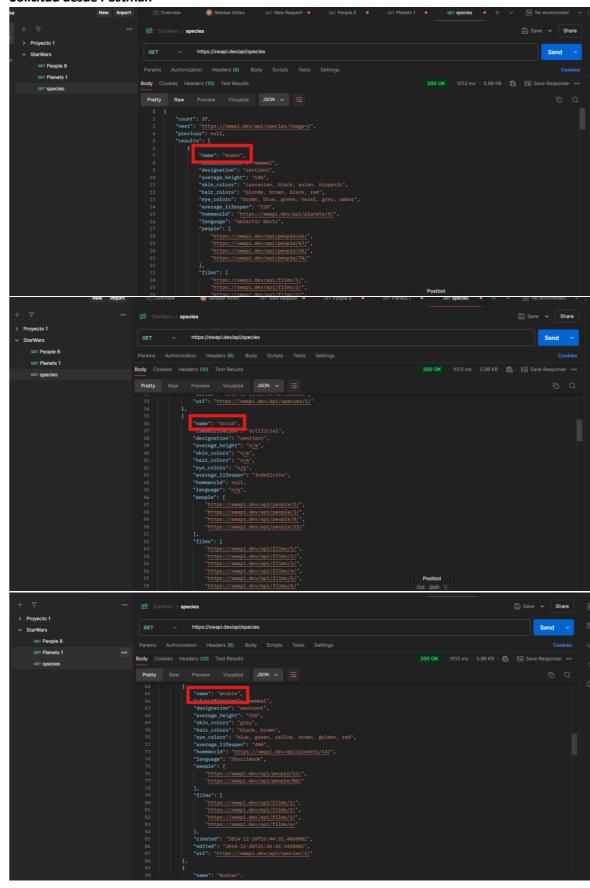

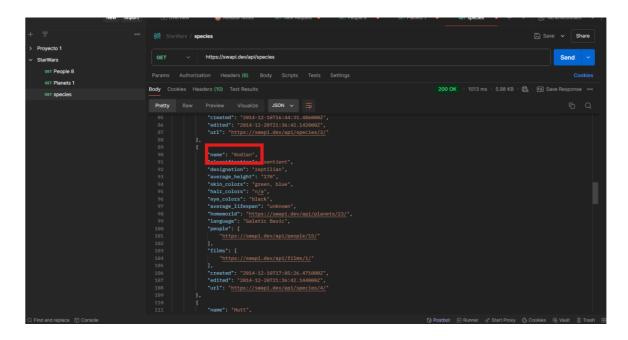

3. Cuando buscamos por species, ¿cuales son las 4 primeras que aparecen?

Las 4 primeras species que aparecen son:

- -Human
- -Droid
- -Wookie
- -Rodian

```
https://swapi.dev/api/ species
 Need a hint? try people/1/ or planets/3/ or starships/9/
 Result:
                                    "url": "https://swapi.dev/api/species/1/"
                                  "name": "Droid",
"classification": "artificial",
                                    "designation": "sentient",
